

STBL-CNC-02

CNC Thermal Break Aluminum Profile Assembly Line

60%
Save labor costs

50%
Increase productivity

100%
Rate of qualified products

FEATURES

- » Intelligent control of production improves quality and reduces costs
- » Flexible production lines improve quality, reduce costs and increase benefits.
- » Intelligent operation makes it easier to click and achieve efficient processing.
- » Automated manufacturing-lower cost, less labor, and less floor space. High-quality components have stable performance and ensure processing quality.
